DETAILED ACTION

Claim Objections

1. Claims 4-9, 11-12, 16-21, 23-24, 27-32, and 34-35 are objected to because of the following informalities:

In claims 4-9, 11-12, 16-21, 23-24, 27-32, and 34-35, it is suggested to delete “may” and replace “may be” with ---is--- or ---are---.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Bowman-Amuah (6,640,249).

Art Unit: 2661

Regarding claims 1-12, Bowman-Amuah discloses a communication services architecture for a netcentric computing system comprising a communication services layer including communication services (1506), communication security services (1508), virtual resource services (1502) and directory services (1504); a transport services layer including message transport services (2404), packet forwarding/interworking services (2406), circuit switching services (2408), transport security services (2410), network address allocation services (2412) and quality of service services (2414); and a network media services layer including media access services (2418) and physical media services (2420). The elements claimed in the dependent claims are shown in figures 15 and 24.

Regarding claims 13-24, claims 13-24 are method claims that have substantially all the limitations of the respective architecture claims 1-12. Therefore, they are subject to the same rejection.

Regarding claims 25-35, claims 25-35 are architecture claims that have substantially all the limitations of the respective architecture claims 1-12. Therefore, they are subject to the same rejection.
